The New Standard of Care for Implant Overdenture Patients

The ERA Implant System by Sterngold combines the proven clinical success of the ERA attachment with an implant, allowing you to immediately stabilize an overdenture and protect an osseous graft site. This implant, which can be used both temporarily and permanently, is unique due to its micro prosthetic head, ability to correct misalignment, and its true vertical resiliency. In fact, the ERA Implant is the only vertically resilient implant in the world that can immediately stabilize a removable prosthesis.

The simplicity of its chairside application and its affordability make the ERA Implant System a secure, reliable choice.

ERA® Implant Lecture & Hands-On Series

“Introducing a New ERA in Implants for Denture Stability”

❖ Increase patient satisfaction
❖ Receive 6 CE Credits
❖ BONUS: $100 discount on ERA Implant Patient Education Model

Permanent and Temporary Stabilization Using the Mini ERA Implant System

This program will include clinical work demonstrating many of the varied uses of the ERA Implant System; from immediate to delayed loading, on a temporary or permanent basis, using the 2.2 and the 3.25 ERA Implants.

During the hands-on section, participants will have the opportunity to “surgically” place both sizes of the ERA Implant into plastic mandibles and to complete the prosthetic procedures using models and dentures. This is designed to give each clinician the basic knowledge needed to begin placing these mini implants.
Dr. Steven Rasner is a general practitioner from Bridgeton, New Jersey. The extraordinary success of his practice has been well documented in multiple journals over the past ten years. Bridgeton is not unlike many towns across the United States and Provinces of Canada. Decimated by economic woes, Bridgeton was ranked as recently as 2001 as the second worst place to live in the United States. Despite this, Dr. Rasner has nurtured a private fee-for-service practice that has emerged as one of the most enduring models of success in dentistry today. It commands fees in the top percentile in any major US city. It has employed a majority of a staff of fourteen from 10-25 years. It has cornered the market on giving back to the community resulting in a 2001 Recognition Award from the United States Congress.

This presentation will address both the practice management and clinical requisites necessary for abundant success. Specifically, the incorporation of mini implants as a treatment alternative to conventional dentures and its enormous impact on the general practice.

Joe L. Carrick, D.D.S.

Dr. Joe Carrick graduated from the University of Texas, San Antonio, in 1977, and served in the U.S. Navy for four years. He has given numerous seminars and lectures nationally and internationally on prosthetic and implant interrelationships as well as facial esthetics. Dr. Carrick has authored numerous articles on implants and cosmetic dentistry. He is a past president of the American Academy of Cosmetic Dentistry and serves as an examiner for that organization. He has also been the editor of the Journal of Cosmetic Dentistry. He has been on the faculty of the Universities of Texas, Baylor, Minnesota, U. of Pacific, and Florida as an adjunct professor and is presently at the University of Buffalo serving as co-director of their five month Mastery Level Prosthetic program.

It was through Dr. Carrick’s questions and ideas that Sterngold first came to create a prototype implant that has evolved into the ERA Implant System. He has had great success for the past several years blending state-of-the-art techniques with the ERA Implant to create exceptional overdenture support.

Dr. Carrick now practices in the Woodlands area of Houston, Texas at the Texas Center for Cosmetic Dentistry in association with Guy M. Lewis, D.D.S.

Hamid Shafie, D.D.S.

Dr. Hamid Shafie received his certificate of Advanced Graduate Studies in Prosthodontics from Boston University Goldman School of Dental Medicine. He is the founder of the Center for Oral Implantology at the Johns Hopkins University where he has been directly involved in the education of dentists in various aspects of implant dentistry. Dr. Shafie is currently president of the American Institute of Esthetic and Implant Dentistry in Washington, DC. He is a faculty member of the Department of Oral and Maxillofacial Surgery at Washington Hospital Center where he provides postgraduate instruction in implant dentistry. He also serves as a visiting lecturer at the University of Pacific School of Dentistry in San Francisco and the Boston University School of Dental Medicine.

Dr. Shafie lectures nationally and internationally on innovative aspects of implant dentistry, and maintains a private practice limited to prosthodontics and implant dentistry in Washington, DC.
Hands-On Course
Schedule & Locations

DATE: October 19, 2007
TIME: 8:00 a.m. - 8:30 a.m. – Continental Breakfast
8:30 a.m. - 3:30 p.m. – Lecture/Hands-On
(Lunch included.)

LOCATION: The Westin La Paloma Resort & Spa
3800 East Sunrise Drive
Tucson, AZ  85718
(520) 742-6000

Course Fee  $395 per attendee
