

Natural looking, secure dentures created in just two visits

The promise of Digital Dentures from Sterngold

You love life! You want to experience it fully. Live it. Savor it.
Why should dentures slow you down?

With the **Baltic Denture System® (BDS)** digital dentures, you can. These dentures provide a beautiful smile replacement better than conventional dentures, with low allergenic potential.

BDS is “no stress”, convenient, and securely held digital dentures that your dentist can create in **as little as two appointments**. Replacement does not require repeat impression making or multiple fittings.

Ask your dentist today if BDS is right for you.

Baltic Denture System® is manufactured under strict German precision and quality by Merz Dental Germany.
