# Baltic Denture System

The Baltic Denture System consistently combines reduced dental process steps with the laboratory-side of digital manufacturing of full dentures.

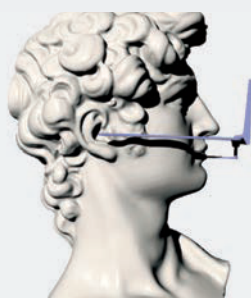

- The most innovative way of digital production of full dentures
- Efficiency potential for practice and laboratory
- Benefits for your patients

## BENEFITS FOR YOUR PRACTICE

- High process reliability due to predictable results
- Finished already at the second appointment by summary of processes
- More time for the patient due to reduced process steps
- Efficient and economical through shorter treatment time

## SATISFIED PATIENTS

- High accuracy of fit & stability
- Reduced pressure points
- Perfect hold
- Reduced allergy potential
- Plaque resistance
- Less dental appointments

## BD KEY<sup>®</sup> Set

- Helps to bring the row of teeth into the right position.
- Is a designed try-in

Centric, functional movements and aesthetics are checked during the bite registration!
